

PROFILE

Co-founder and hands-on technology leader with twenty years of experience building and modernizing digital platforms. I led Deliverart from startup to full acquisition by TeamSystem, retaining responsibility across product, architecture, cloud and delivery. Today I build applied-AI systems and business-critical products.

SELECTED EXPERIENCE

2016 - Present

Co-founder, former CTO & Technology Lead / Deliverart

Ongoing operating role. As co-founder and CTO, I connected product needs, architectural choices and delivery, taking Deliverart from startup through full acquisition by TeamSystem. I led the progressive modernization of frontends, APIs, cloud, tests, CI/CD and TypeScript SDKs without disrupting operations. Following the acquisition, I remain responsible for the platform's technological evolution.

2018 - Present

Independent Senior Consultant / Verisure Italy

Independent consulting engagement. Since 2018 I have worked across analysis, solution design and hands-on development of business-critical lead acquisition systems for the Italian market. The work spans a multichannel ecosystem connecting commercial processes and digital platforms, with a focus on automation, reliability, operational continuity and shorter delivery timelines across comparable workflows.

2025 - Present

Founder & AI Product Builder / ErinTechLabs

Independent entrepreneurial venture. I turn operational problems into products, owning discovery, architecture, implementation and production delivery. Systems include a shift planning engine that recalculates previously manual plans in seconds and Documento Facile, an AI pipeline for reading, normalizing and comparing personal documents with history and human oversight.

IMPACT

20 years

BUILDING SINCE 2006
STILL HANDS-ON

DISTINCTIVE EXPERTISE

- Technology & product leadership
- Platform architecture
- Hands-on engineering delivery
- Applied AI product systems

TypeScript / Next.js / Node.js / Symfony / API Platform / AWS / CI/CD / AI-LLM

SELECTED SYSTEMS & OUTCOMES

Deliverart / End-to-end modernization

I chose incremental modernization over an isolated rewrite, evolving frontends, APIs, cloud services and delivery processes while the product remained operational. Typed contracts, shared SDKs, automated tests and CI/CD improved consistency across domains and integrations.

Next.js / TypeScript / Symfony / API Platform / AWS ECS / automated testing / CI/CD

Applied AI / Operational systems

I designed an engine that translates company rules, operational constraints and fairness criteria into balanced monthly schedules. In parallel, I build document pipelines combining LLMs, normalization, historical comparison and human oversight to produce understandable, verifiable and useful outcomes.

99.7% accuracy observed in testing / 12 months / seconds instead of person-days

Verisure Italy / Senior consulting

I work from the operational problem through to the production solution: flow analysis, integration design, development and continuous improvement. The result is an ecosystem able to support volumes that have grown over time, coordinate multiple channels and shorten delivery timelines compared with similar processes.

multichannel / automation / reliability / operational continuity

EARLIER EXPERIENCE

2016 - 2017	Senior PHP Programmer	CarPlanner
2015 - 2016	Senior PHP Developer / Symfony 2 Specialist	DigiTouch S.p.A.
2010 - 2015	Analyst / Developer	TheBlogTV S.p.A.
2010	Developer	Onemeet S.p.A.
2009 - 2010	Developer / Frontend	Tecnorg
2009	Java / JavaScript Developer	Proxima
2008 - 2009	PHP / Frontend Developer	Cpu Group S.r.l.
2007	Intern / Developer	Web Site S.r.l.

OPEN SOURCE & PRODUCTS

FocusPath

Creator and maintainer of an open-source visual keyboard-navigation scanner shipped as a CLI, library, web app and API.

focuspath

node-ffmpeg

Maintainer; 3.8M npm downloads in the 12 months ending August 2026 on earlier versions. Led the TypeScript modernization and v1.0 release.

node-ffmpeg

Documento Facile

An AI product for understanding and comparing personal documents while keeping human control visible.

documentofacile.it

EDUCATION

Diploma in Information Technology / I.T.I.S. G. Vallauri
