

PROFILE

Twenty years in software across technical leadership, architecture, products and business. I co-founded a startup acquired by TeamSystem and now bring AI, TypeScript and distributed systems into real operational problems while staying hands-on.

SELECTED EXPERIENCE

2025 - now

Founder / ErinTechLabs

Custom software, integrations and applied AI. Technical direction and delivery of products built around real business operations.

2017 - now

Co-founder & technical leadership / Deliverart

Historical CTO of the food-tech platform. I continue to guide its technological evolution after TeamSystem completed its acquisition in 2026.

2018 - now

IT Consultant / Verisure

Analysis and development of microservices and martech systems for Italy: hundreds of thousands of leads per year across roughly ten systems and channels.

CAPABILITIES

- Technical leadership
 - Applied AI
- Architecture & platforms
 - Hands-on execution

TypeScript / Node.js / React / API & SDK / AI-LLM / Agents / Cloud / Serverless

EARLIER EXPERIENCE

2016 - 2017	Senior PHP Programmer	CarPlanner
2015 - 2016	Senior PHP Developer / Symfony 2 Specialist	DigiTouch S.p.A.
2010 - 2015	Analyst / Developer	TheBlogTV S.p.A.
2010	Developer	Onemeet S.p.A.
2009 - 2010	Developer / Frontend	Tecnorg
2009	Java / JavaScript Developer	Proxima
2008 - 2009	PHP / Frontend Developer	Cpu Group S.r.l.
2007	Intern / Developer	Web Site S.r.l.

OPEN SOURCE

node-ffmpeg - 3.8 million npm downloads in twelve months on the historical release. In 2026 I modernized it in TypeScript and released v1.0.0 for Node.js 24, ESM and CommonJS.
